GitHub | LinkedIn | CodeChef

PROFESSIONAL SUMMARY

Computer Science and Engineering (AIML) undergraduate with hands-on experience in full-stack web development, REST API integration, database management, and software testing. Proficient in Java, C++, Python, and JavaScript, with a strong foundation in data structures and algorithms, object-oriented programming, and core computer science concepts. Experienced in building end-to-end applications, developing backend functionalities, integrating databases, and debugging software systems. Interested in building scalable and reliable software applications.

EDUCATION

ABES Engineering College, Ghaziabad 2023 – 2027
Bachelor of Technology (B.Tech), Computer Science and Engineering (AIML)
CGPA: 8.67/10

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript, SQL
Core CS: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Frontend: HTML5, CSS3, JavaScript, React.js, TypeScript, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, API Integration, CRUD Operations
Databases: MongoDB, PostgreSQL, MySQL, Supabase
AI/ML: TensorFlow, Keras, Scikit-learn, NumPy, Pandas, Google Gemini AI, LLM Integration
Developer Tools: Git, GitHub, Postman, VS Code, Vite, Streamlit

EXPERIENCE

MERN Stack Intern Dec 2025 – Mar 2026
Unified Mentors Pvt. Ltd.

- Developed 5+ full-stack modules using the MERN stack to implement user-facing application functionalities.
- Integrated 10+ RESTful APIs supporting authentication, CRUD operations, and frontend-backend communication.
- Tested and validated backend APIs using Postman, identifying and resolving integration issues before deployment.

Web Developer Intern May 2025 – Jun 2025
Launched Global

- Developed responsive web interfaces and reusable React components for desktop, tablet, and mobile devices.
- Improved frontend maintainability by organizing reusable UI components across multiple application pages.

PROJECTS

RecoverAI – AI Revenue Recovery Platform Live Demo — GitHub

Tech Stack: React.js, TypeScript, Node.js, Express.js, MongoDB Atlas, Razorpay

- Built and deployed a full-stack fintech platform for analyzing failed payments, predicting recovery likelihood, and prioritizing automated recovery workflows.
- Integrated Razorpay TEST MODE with HMAC-SHA256 signature verification, webhook idempotency, and persistent transaction tracking.

PrepPilot AI – AI Interview Preparation Platform Live Demo — GitHub

Tech Stack: React.js, TypeScript, Supabase, PostgreSQL, Google Gemini AI, Tailwind CSS

- Developed an AI-powered interview preparation platform generating company-specific mock interviews and personalized AI-generated feedback.
- Integrated Google Gemini AI and PostgreSQL-backed user progress tracking to support application workflows and persistent data management.

DigitVision – Handwritten Digit Recognition GitHub

Tech Stack: Python, TensorFlow, Keras, NumPy, Scikit-learn

- Trained and evaluated a TensorFlow model on the MNIST dataset for handwritten digit classification, achieving 92.8% classification accuracy.

ACHIEVEMENTS

- Solved **500+ Data Structures and Algorithms problems** across LeetCode and CodeChef.
- Qualified **GATE 2026** in Computer Science.
- Published research in IEEE Conference Proceedings (ICIPTM 2026) titled *Early Fusion-Based Multimodal Analysis for Identifying Mental Health Conditions from Social Media Data*. IEEE Xplore.
